NANO'TOWER

THE MINI-SCAFFOLD WITH MAXI-FLEXIBILITY

Ref.	22406410
Platform height	0.25 to 1.00 m
Overall height of the deployed product	1.32 to 2.07 m
Overall width of the deployed product	1.18 m
Overall length of the deployed product	1.55 m
Weight	37 kg
Working height	2.25 to 3.00 m
	3178740203559
Sizes of the folded product	L: 0.65 x W: 1.18 x D: 1.42 m
Optional transport kit	ref.: 22406090

MADE IN FRANCE

We dedicate human skills and industrial resources to creating quality products and services that meet all standard and made-to-measure requirements for height-access systems and working at heights in perfect safety. With production capacities in different points in France (Trévoux and Ailly-sur-Noye), we market «universal access solution» products (ladders, stepladders, platforms, mobile scaffolding, and permanent or temporary roof guardrails), as well as construction applications (scaffolding, umbrella roofs, and material hoists), together with solutions developed for industrial maintenance, aeronautics and transport.

An R&D centre of excellence

Our R&D team is comprised of marketing and technical engineers who determine our Research and Development strategy.

For us, R&D means

- Product creation and innovation;
- Special product design;
- Over 110 patents in force;
- A design office;
- 30 engineers;
- over 200 project studies and realizations completed over 2018 and followed by field support.

Ailly-sur-Noye

**MADE IN FRANCE AT OUR
AILLY-SUR-NOYE
PRODUCTION UNIT**

**2 YEAR
